The average monthly salary used in this calculation is adjusted at the end of each reporting period following the average monthly salary of the 6-month period up to the reporting date. Increases or decreases to the accrued amount other than actual payment to employee will be taken to the separate income statement.

This accrued severance pay is used to settle the termination allowance to be paid to employee upon termination of their labour contract following Article 46 of the Labour Code.

3.11 *Foreign currency transactions*

Transactions in currencies other than the Company's reporting currency of VND are recorded at the actual exchange rates at transaction dates, determined as follows:

- Transactions resulting in receivables are recorded at the buying exchange rate of the commercial bank designated for collection; and
- Transactions resulting in liabilities are recorded at the selling exchange rate of the commercial bank designated for payment.

At the end of the year, monetary balances denominated in foreign currencies are translated at the actual exchange rates at the balance sheet date, determined as follows:

- Monetary assets are translated at the buying exchange rate of the commercial bank where the Company conducts transactions regularly; and
- Monetary liabilities are translated at the selling exchange rate of the commercial bank where the Company conducts transactions regularly.

All foreign exchange differences incurred are taken to the separate income statement.

3.12 *Appropriation of net profits*

Net profit after tax is available for appropriation to shareholders after approval in the shareholders' meeting, and after making appropriation to reserve funds in accordance with the Company's Charter and Vietnamese regulatory requirements.

The Company maintains the following reserve funds which are appropriated from the Company's net profit after tax as proposed by the Board of Directors and subject to approval by shareholders at the Annual General Meeting.

Bonus and welfare fund

This fund is set aside for the purpose of pecuniary rewarding and encouraging, common benefits and improvement of the employees' benefits, and presented as a liability in the separate balance sheet.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS (continued)
as at 31 March 2026 and for the period ended 31 March 2026

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.13 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, excluding trade discount, rebate and sales return. The following specific recognition criteria must also be met before revenue is recognised:

Sale of goods

Revenue is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually upon the delivery of the goods.

Rental income

Rental income arising from operating leases is accounted in separate income statements on a straight-line basis over the lease term.

Rendering of services

Revenue is recognised when the services had been performed and completed.

Interest

Revenue is recognised as the interest accrues unless collectability is in doubt.

Dividends

Income is recognised when the Company's entitlement as an investor to receive the dividend is established.

3.15 Taxation

Current income tax

Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted as at the separate balance sheet date.

Current income tax is charged or credited to the separate income statement, except when it relates to items recognised directly to equity, in which case the current income tax is also dealt with in equity.

Current income tax assets and liabilities are offset when there is a legally enforceable right for the Company to set off current tax assets against current tax liabilities and when the Company intends to settle its current tax assets and liabilities on a net basis.

Deferred tax

Deferred income tax is provided using the liability method on temporary differences at the balance sheet date between the tax base of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences and carried forward unused tax losses, to the extent that it is probable that taxable profit will be available against which deductible temporary differences and carried forward unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Previously unrecognised deferred tax assets are re-assessed at each balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS (continued)
as at 31 March 2026 and for the period ended 31 March 2026

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled based on tax rates and tax laws that have been enacted at the balance sheet date.

Deferred tax is charged or credited to the separate income statement, except when it relates to items recognised directly to equity, in which case the deferred tax is also dealt with in the equity account.

Deferred tax assets and liabilities are offset when there is a legally enforceable right for the Company to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority on either the same taxable entity or when the Company intends either to settle current tax liabilities and assets on a net basis or to realise the assets and settle the liabilities simultaneously, in each future year in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

3.16 *Related parties*

Parties are considered to be related parties of the Company if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions, or when the Company and other party are under common control or under common significant influence. Related parties can be enterprise or individual, including close members of their families.
